

# Prepare your first responders with complete emergency care training

## Philips HeartStart Training Solutions

### Product information

Philips HeartStart Defibrillators are only part of a complete solution for an effective early defibrillation program. Training your responders is critical to help ensure a confident response to a sudden cardiac arrest (SCA) event.

That's why Philips offers a wide range of HeartStart training solutions, from nationally

recognized in-person training courses to computer-based learning programs, all designed to instill the confidence that's needed when treating a person in cardiac arrest.

With Philips HeartStart training solutions, you'll appreciate the peace of mind that comes from knowing your personnel are trained and prepared in case an event should occur.

# Philips HeartStart Training

## In-person courses

Philips has teamed with the following nationally recognized training organizations to provide certified CPR/AED training. Each course is taught by professional instructors and is designed to help students

learn emergency response skills in a low-stress, hands-on environment. Contact your Philips representative for details about each organization's training courses and schedules.

### American Heart Association

The American Heart Association ([www.americanheart.org](http://www.americanheart.org)) is a national voluntary health agency whose mission is to reduce disability and death from cardiovascular diseases and stroke. Its emergency response courses have trained millions of volunteers and created a national network prepared for basic life support (BLS) emergencies.

### Medic First Aid International, Inc.

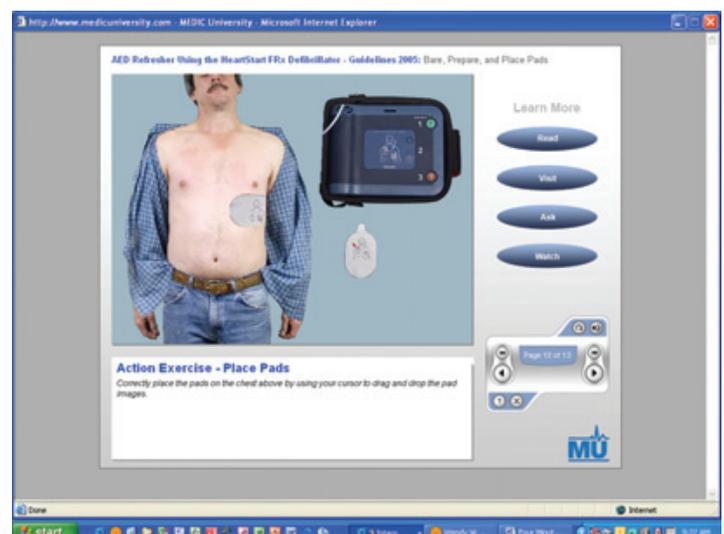

Medic First Aid ([www.medicfirstaid.com](http://www.medicfirstaid.com)) is a worldwide innovator and leader in CPR/first aid emergency care training programs for business, industry, and the public. They have certified an international network of over 80,000 instructors, who have trained more than nine million first aid providers over the past 26 years.

## Computer-based training

### • Online AED refresher training

Online training for Philips HeartStart Defibrillators is provided through Medic First Aid's online Medic University. Although this is not a Certification course (as the student does not get a certificate), this interactive, online course is designed to provide AED refresher training and provides real-time simulations of sudden cardiac arrest events.

During this course, students follow the Chain of Survival and practice their AED skills by using one of three Philips Defibrillators. After completing the training scenarios, students receive feedback on their performances, including areas where additional practice may be needed.

Online training for Philips HeartStart AEDs allows students to practice skills at their own pace.

# Solutions

- **HeartSaver® AED Anytime™ personal learning program, Philips HeartStart version**

This self-directed learning program is designed for organizations that want to provide emergency response training to their employees or designated first responders using computer-based learning tools. By providing students with a flexible, research-proven alternative to traditional classroom-style training, it allows students to learn adult CPR and AED skills individually or in a group setting, and at their own pace.

After completing this innovative program and passing a skills check by an authorized

American Heart Association instructor, students can receive an AHA two-year CPR/AED training certification. (AHA skills check is available separately.)

- **HeartSaver® AED Anywhere™ CD-ROM, Philips HeartStart version**

This training software, available separately or as part of the AED Anytime program, can be used to supplement instructor-led courses, and also provides convenient AED refresher training. With this software, students practice their skills using Philips HeartStart AEDs during computer-based scenarios.

**Each HeartSaver AED Anytime kit contains:**

- Personal CPR training manikin (Mini Anne™)
- 30-minute CPR skills DVD
- Interactive Heartsaver AED Anywhere CD-ROM (Philips HeartStart version)
- Heartsaver AED student manual
- Personal Pocket Mask™ CPR barrier and gloves
- Mini Anne spare lung and manikin wipes

## Tools for trainers

HeartStart Training Toolkits are designed for professional training organizations and in-house training departments, including EMS, fire, police, hospitals, and corporations. These Toolkits provide all of the elements needed to successfully train employees or designated first responders on how to use Philips HeartStart Defibrillators. Separate Toolkits are available for the HeartStart FR2+, FRx, and OnSite Defibrillators.

Each model-specific Toolkit contains a DVD with the following training content: overview of sudden cardiac arrest (SCA) and the

role of early defibrillation, setup of the Philips Defibrillator; adult defibrillation, infant/child defibrillation, summary of operation, troubleshooting, data management and device configuration, maintenance, and brief overviews of the other HeartStart Defibrillators. The FRx and OnSite DVDs also include a training section for the CPR Coaching feature.

In addition to the DVD, the Toolkits also contain a CD with the following components: a Microsoft PowerPoint overview presentation that trainers can use to teach students about SCA and its treatment with defibrillators, a product-specific PowerPoint presentation that corresponds to the chapters in the DVD, an Instructor's Guide, a Student's Guide for use with the video and/or the PowerPoint presentations, and a description of the standard training scenarios available for each defibrillator model.
